

“Change the way you look at things and the things you look at change” -Dwayne Dyer

Just like in the parable, we see what we experience and when we open to others perspective what we see and experience change. We are able to make better decisions.

Opening yourself to the perspective of others increases creativity, and innovation, speeds problems solving and creates greater possibility.

## Participants will:

### **Embrace Perspective as a Super Power**

Discuss the power of perspective as a leader and the value to the organization.

### **How to Get Unstuck**

We all get stuck from time to time; overwhelmed, overloaded or distracted. Through an interactive fun exercise learn how we know we are stuck and what strategies we can use to get unstuck quicker and how to use those skills to help others get unstuck too.

### **Avoid Conflict**

Understand the different personality types and how they affect our trust, communication and decision speed. Interact with a powerful strategy to avoid conflict and better communicate with your family, friends, co-workers, clients and boss.

### **Growth and Innovation**

This group exercise will create greater awareness of our limitations to growth when we limit our perspectives and how external constraints create stress that can either get us stuck or open up possibility depending on the perspective.

### **Closing**

The group comes back together for closing remarks and a funny story that sums up the human condition and create an action plan based on what participants took away.

**Penny Zenker** is an international speaker and best-selling author. She is passionate about helping people live more fulfilling lives through reducing stress, improving communication, and creating greater passion and focus. Her experience includes building and selling a multi-million dollar business, managing business turnarounds, living abroad for 16 years, and worked 5 years a Tony Robbins business coach. She will challenge you to think differently and inspire you to be your best. Her easy to understand frameworks make implementation fast and easy.
